

Using Technology to Achieve Results

Is your Information Technology helping you achieve your business goals or is it holding you back?

Do you understand what your IT staff does to help meet your business goals?

How is the money you have invested in technology being leveraged to help move your business forward?

Are you compliant with regulations and following industry best practices with your company's technology?

At Warren Averett we offer a comprehensive and independent evaluation of your information technology systems to identify opportunities and offer solutions that can be implemented in your organization. We also help you prioritize those solutions, giving you a step-by-step process through which you can leverage your technology goals and align them with your business needs.

Services Available

- Strategic technology assessment
- Policy review
- Risk assessment
- Comprehensive findings report
- Penetration and vulnerability testing
- Network infrastructure analysis
- IT organizational analysis
